Educational Tips on using Mobile Check Deposit

- Before logging into the TouchBanking Mobile App, close all other apps running in the background on your mobile phone.
- Endorse the back of each check with the information required by the Bank (see below).
- Carefully enter the check amount to ensure it matches the amount written on your check.
- Flatten folded or crumpled checks before taking your photos.
- Keep the check within the view finder on the camera screen when capturing your photos.
- Try not to get too much blank area surrounding the check.
- Take the photos of the front and the back of your check in a well-lit area and place the check on a solid dark background before taking the photos.
- Keep your phone flat and steady above the check when taking your photos and hold the camera as square to the check as possible to reduce corner to corner skew.
- Make sure that the entire check image is visible and in focus before submitting your deposit.
 - No shadows across the check, all four corners are visible, check is not blurry
- The MICR line (numbers on the bottom of your check) is readable.
